NATOMA TECHNOLOGIES DEPLOYS U.S. FEDERAL APPLICATION IN AMAZON WEB SERVICES GOV CLOUD

ARLINGTON, VA (March 17, 15) – Natoma Technologies, Inc. announced today that it successfully deployed a mission critical, US federal government application on Amazon Web Services GovCloud (US).

Natoma holds a five-year prime contract with the US General Services Administration (GSA) to provide operations and maintenance services for Electronic Project Management (ePM), a complex and integrated suite of tools with 3500+ users across all 11 GSA regions to manage over \$3B in annual construction projects for GSA’s Public Building Services (PBS) Office of Design & Construction (ODC).

“We are excited to successfully achieve an authorization for ePM to go live on the AWS cloud,” said Jason March, Natoma’s Vice President and Federal Practice leader. “Moving ePM to the cloud will allow GSA to reduce operational support costs while delivering system enhancements to improve the ePM user experience,” he added. “This migration supports the overall strategy to maximize the use of cloud-based services and improve the return on GSA’s IT investment.”

As part of this contract, Natoma migrated the application from its legacy-hosting infrastructure into a new environment on AWS GovCloud (US). The team worked closely with GSA PBS personnel to perform a rigorous security assessment and conduct user acceptance testing prior to authorization to go live. ePM is authorized to operate at the FISMA Moderate level and integrates with other GSA enterprise applications.
