NATOMA TECHNOLOGIES ENHANCES FEDERAL TECHNOLOGY MARKET PRESENCE WITH AFFIRM PARTNERSHIP

ARLINGTON, VIRGINIA (April 6, 2015) – Natoma Technologies, Inc., a public sector-focused information technology consulting firm and systems integrator announced today their status as a sustaining partner of AFFIRM, the Association for Federal Information Resources Management.

AFFIRM is a non-profit, volunteer-based, educational organization whose overall purpose is to improve the management of information, and related systems and resources, within the federal government. “AFFIRM is thrilled to have Natoma on as a sustaining partner,” said Barry West, AFFIRM President. “Their experience in federal, as well as the state and local technology markets will benefit the organization and help expand our knowledge base.”

With the launch of its federal practice in October 2012, Natoma’s presence in the Washington, DC market has steadily grown, including a five-year, \$17.5M prime contract with General Services Administration (GSA) for cloud computing services. As a Sustaining Member of AFFIRM, Natoma will gain unique visibility into the technology issues facing government clients and engage in a direct dialog with federal technology leaders on solutions.

Natoma personnel, including Julie Lovett, Senior Project Manager, and Jason Love, Federal Business Development Manager, will serve as corporate representatives for Natoma at AFFIRM events and engage with organization’s market-facing committees. “AFFIRM is one of the leading technology industry organizations in our market,” said Jason March, Natoma’s Vice President and Federal Practice leader. “We are proud to be affiliated with AFFIRM and look forward to collaborating on the issues facing the public sector technology industry.”
