NATOMA TECHNOLOGIES ANNOUNCES EXPANSION OF CALIFORNIA AND WASHINGTON D.C. AREA OFFICES TO ACCOMODATE GROWTH

SACRAMENTO, CALIFORNIA (August 13, 2014) – Natoma Technologies, Inc., a leading provider of innovative information technology and software services for federal and state government agencies moved both its corporate headquarters and its federal practice to new offices earlier this month to accommodate the company’s continued growth and expansion.

Natoma’s corporate headquarters remains at 455 Capitol Mall in Sacramento but has relocated to larger space on the building’s seventh floor. Natoma’s federal practice has also moved to a new location that allows the federal group to expand into new office space located at 2500 Wilson Boulevard in Arlington, Virginia.

“As we continue to expand our government IT services, the additional space is necessary to accommodate new staff and new conference and media rooms to collaborate with our state and federal clients. Last year, we grew by 47% and anticipate similar growth this year” said Martin McGartland, Natoma’s President and CEO.

Complementing the company’s growth and emphasis on high quality delivery of IT services, Natoma was successfully appraised at Maturity Level 2 of the Software Engineering Institute’s (SEI) Capability Maturity Model® Integration for Development (CMMI-DEV) in late July of this year.

“Our growth has accelerated and we are rapidly adding new personnel in the area to support our federal contracts,” said Jason March, Natoma’s Vice President and Federal Practice Leader, “Arlington is a natural fit for Natoma—the Clarendon neighborhood is a fantastic location and offers unparalleled energy, amenities, and convenient access to Washington.”

Natoma is hosting a Corporate Open House on August 27th where clients, technology business partners, and government officials will gather to celebrate these new milestones in the company’s 16-year history. Those interested in attending this event

should send an inquiry to events@natomatech.com for event details. Details for a similar open house at our Arlington location will be announced soon.

About Natoma Technologies

Since our founding in 1998, state and federal agencies have trusted Natoma Technologies to deliver information technology solutions that control costs, improve efficiency, and help them work smarter. We work with public sector organizations to enhance delivery of citizen services and improve management of taxpayer dollars by modernizing legacy information systems and business processes. We help clients leverage the best of today's commercially available technologies and develop custom solutions that precisely meet their needs. With headquarters in Sacramento, CA and offices in Long Beach, California and Washington DC, Natoma Technologies partners with government clients to solve complex data problems and improve organizational performance. As a technical consulting firm and systems integrator, Natoma is focused on helping public sector organizations achieve the maximum returns on their technology investment. We are committed to delivering our projects 100% on time and on budget, every time. That's who we are. That's what we do. For additional information, visit us at www.natomatech.com
