## **NATOMA TECHNOLOGIES APPRAISED AT CMMI MATURITY LEVEL 2**

SACRAMENTO, CALIFORNIA (July 8, 2013) – Natoma Technologies, Inc., a leading provider of innovative information technology and software services for federal and state government agencies, announced today that it successfully achieved a Maturity Level 2 rating in the Software Engineering Institute's (SEI) Capability Maturity Model® Integration for Development (CMMI-DEV). The assessment was led by an independent, SEI-approved appraiser who conducted the Standard CMMI Appraisal Method for Process Improvement (SCAMPI)-A Level 2.

CMMI is a process improvement approach that provides organizations with the essential elements of effective processes that ultimately improve their performance.

An appraisal at maturity level 2 indicates the organization is performing at a “managed” level. At this level, projects have ensured that processes are planned and executed in accordance with policy; projects employ skilled people who have adequate resources to produce controlled outputs; involve relevant stakeholders; are monitored, controlled and reviewed; and are evaluated for adherence to their process descriptions.

“This is an important achievement for Natoma signifying our company’s long-standing commitment to delivering technology solutions at the highest standards for our industry,” said Martin R. McGartland, Natoma’s President and CEO, “A Maturity Level 2 Rating validates Natoma’s delivery methodology and demonstrates the sound development principles we have developed after 16 years in business. We are poised to win and deliver on larger, more complex technology programs across the public sector market.”

## **About Natoma Technologies**

Since our founding in 1998, state and federal agencies have trusted Natoma Technologies to deliver information technology solutions that control costs, improve efficiency, and help them work smarter. We work with public sector organizations to enhance delivery of citizen services and improve management of taxpayer dollars by modernizing legacy information systems and business processes. We help clients leverage the best of today's commercially available technologies and develop custom solutions that precisely meet their needs. With headquarters in Sacramento, CA and offices in Long Beach, California and Washington DC, Natoma Technologies partners with government clients to solve complex data problems and improve organizational performance. As a technical consulting firm and systems integrator, Natoma is focused on helping public sector organizations achieve the maximum returns on their technology investment. We are committed to delivering our projects 100% on time and on budget, every time. That's who we are. That's what we do.
